

Telehealth 2021: A Look at the Stats

Telehealth has soared in popularity over the past few months as physical distancing continues as a means to curb the spread of the coronavirus. The following stats paint the picture of its meteoric adoption by both clinicians and patients alike.

74%

Share of millennials who prefer telehealth appointments versus in-person visits.

60%

Share of clinicians who believe telehealth is a "very acceptable" mode of providing medical advice.

89%

Share of clinicians who claim telemedicine is a satisfactory way to follow-up with patients.

49%

Consumer adoption of telemedicine services in 2020, up from 11% in 2019.

\$49 to \$250

Range of monthly costs of telehealth visits.

\$305 billion

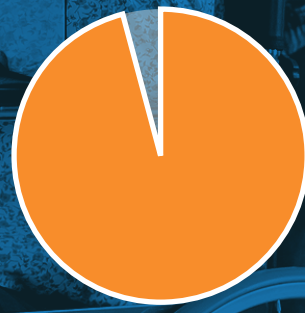

Anticipated annual savings to the healthcare industry thanks to telehealth technologies.

30% to 40%

Potential savings among members of health sharing ministries versus traditional health insurance.

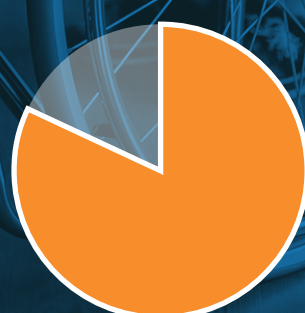

10% to 15%

Reduction in cost of doctor visits via telehealth.

96%

Share of telepsychiatry patients who are satisfied with their mental health care via telemedicine.

82%

Share of consumers who believe digital care is the best way to keep tabs on their health.

When it comes to healthcare, Americans not only want quality care and flexibility, but they also seek affordability and accessibility. Telehealth offers consumers a more accessible and affordable method of receiving medical care and advice, but it still costs money.

With UHSM, members can benefit from a more affordable way to get

healthcare savings, with potential savings of up to 30% to 40% when compared with the costs of traditional insurance plans. Even better, health sharing ministry members get access to unlimited telemedicine visits with a board-certified healthcare professional included in their plan at \$0 per consult.
